SC = Specific Conductivity

CACE = Conductivity After Cation Exchange
DCACE = Degassed Conductivity After

Cation Exchange

H<sub>2</sub> = Dissolved Hydrogen DO = Dissolved Oxygen

pH = pH Value ORP = Oxidation/Reduction Potential PO<sub>4</sub> = Phosphate

SiO<sub>2</sub> = Silica Na = Sodium  $N_2H_4$  = Hydrazine TOC = Total Organic Carbon

UV<sub>254</sub> = Organics Material TURB = Turbidity DISF = Disinfectant

Required parameter by guidelines and standards

O = Optional parameters depending on water quality, water treatment process, power plant configuration, operation mode, metallurgy and chemical treatment applied

# **Conductivity (Acid)**

#### **AMI Powercon A**

Conductivity after cation exchange (CACE)

- Temperature compensation for strong acids
- Integrated, easy to replace cation exchanger with automatic deaeration
- Option for second pre-rinsed cation exchanger to allow fast replacement of exhausted cation resin

Acid Conductivtiy 0.055-1000 μS/cm

#### Conductivity (Specific/Acid)

#### **AMI Deltacon Power**

Conductivity before and after cation exchange (CACE) with conventional resin columns

- Calculation and display of pH and alkalizing reagent concentration by differential conductivity measurement (VGB-S-010-T-00)
- Automatic monitoring of cation resin consumption with alarm
- Selectable temperature compensations (for all common alkalizing agents and strong acids)

Specific Conductivity
0.055-1000 µS/cm
Acid Conductivity
0.055-1000 µS/cm
pH Range
pH 7.5-11.5
Alkalizing Agent
Concentration in ppm
(e.g ammonia 0.01-10 ppm)

#### **AMI-II CACE**

Conductivity before and after cation exchange (CACE) with EDI module for automatic and continuous resin regeneration

- No resin columns needed:
  - no resin exchange
  - no chemicals for regeneration
  - reduced maintenance
  - reduced operation costs
- Uninterrupted measurement of CACE: No gaps and no high CACE values caused by exhausted resin column
- Available version as separated transmitter and module for system integration

Specific Conductivity
0.055-1000 µS/cm
Acid Conductivity
0.055-1000 µS/cm
pH Range
pH 7.5-11.5
Alkalizing Agent
Concentration in ppm
(e.g ammonia 0.01-10 ppm)

# **Conductivity (Degassed Acid)**

# **Conductivity (Specific)**

#### **AMI Deltacon DG**

Specific conductivity, CACE and degassed CACE according to ASTM D4519 via sample reboiler

- Atmospheric pressure measurement for automatic boiling point compensation if air pressure changes, to ensure reproducible measurements
- Safe operation due to automatic shutdown function of sample heater if sample flow is low
- tem: cooling water supply not

• Integrated sample cooling sysnecessary

Conductivity (Specific, Acid, Acid Degassed) 0.055-1000 µS/cm pH Range pH 7.5-11.5 **Alkalizing Agent** Concentration in ppm (e.g ammonia 0.01-10 ppm)

#### AMI-II CACE DG

Specific conductivity, CACE and degassed CACE according to ASTM D4519 via sample reboiler with EDI Module for automatic and contious resin regeneration.

- Sample heater with continuous heating point determination based on atmospheric pressure
- Effective and stable CO2 removal from sample
- Efficient sample cooling with incoming sample: no hot drain.
- Continuous operation with automatic regeneration of the cation exchange resin by electrodeionization (EDI)
- Minimal sample flow, panel size and electrical power consumption

Conductivity (Specific, Acid, Acid Degassed) 0.055-1000 µS/cm pH Range pH 7.5-11.5 Alkalizing Agent Concentration in ppm (e.g. ammonia 0.01 to 10 ppm)

#### **AMI Powercon S**

Specific (total) conductivity for high purity water

- Selectable temperature compensations for different sample qualities and alkalizing agents
- Automatic zero verification with integrated high precision resistor
- Two-electrode titanium conductivity sensor with high precision cell constant, integrated Pt1000 temperature probe
- Patented slot lock sensor design for easy installation and release

Specific Conductivtiy 0.055 µS/cm-30 mS/cm

#### **Disinfectants**

#### **AMI Solicon4**

Specific (total) conductivity for surface water, cooling water and effluents

- Selectable temperature compensation with absolute (none), linear coefficient or non-linear function
- Insensitive to fouling due to 4-electrodes principle. No measuring errors due to polarization effects
- Measurement of concentrations (for NaCl, NaOH and acids in %), salinity and TDS possible
- Optional deltaT sensor for flow detection

Specific Conductivity 0.1 µS/cm-100 mS/cm Salinity (as NaCl) 0-4.6% TDS (Coefficient) 0.0 mg/l-20 g/l

#### **AMI Codes-II**

Colorimetric measurement (DPD-method) of free chlorine and other disinfectant concentrations

- No interference with sea water and effluents, or additives like corrosion inhibitors and antiscalants
- High accuracy and reproducibility due to automatic zero-value calibration before each measurement
- Reduced maintenance with optional cleaning module and high tolerance against fouling

#### **AMI Codes-II CC**

Colorimetric measurement (DPD-method) of free, bound and total chlorine

- Determines free available and total chlorine, and calculates monochloramine, dichloramine and combined chlorine
- Freely adjustable measuring intervals for optimized use of reagents
- Fast and easy to use verification with userfriendly solid state standard

#### **AMI Codes-II TC**

Colorimetric measurement (DPD-method) of total chlorine and dichloramine

- Determines total chlorine and calculates dichloramine
- Continuous, automatic monitoring of main instrument functions (dirty photometer, sample flow, reagents level)
- Integrated pH measurement with temperature compensation available as option

Free Chlorine
0-5 ppm
Chlorine Dioxide, Bromine
0-6 ppm
Ozone
0-1 ppm

Free Chlorine
0-5 ppm
Bound Chlorine
by calculation
Total Chlorine
0-5 ppm
Monochloramine
by calculation
Dichloramine
by calculation

Total Chlorine (standard mode) 0-5 ppm Total Chlorine (extended mode) 0-10 ppm Dichloramine by calculation

# **Dissolved Hydrogen**

# Hydrazine/ Carbohydrazide

#### **AMI Hydrogen QED**

Measurement of trace dissolved hydrogen for corrosion monitoring

- Faraday electrode for automatic or manual verification by electrochemically generated hydrogen concentration in the ppb-range
- Automatic sensor self-regeneration at configurable intervals
- Long-life amperometric hydrogen sensor

#### **AMI Oxytrace**

Amperometric measurement of trace dissolved oxygen concentrations

- Sensor with 3 electrode set-up (gold cathode, silver anode and silver guard) and temperature sensor. Faster initial response time after maintenance due to silver guard
- Automatic temperature and air pressure compensation for simple calibration using ambient air
- Automatic surveillance of electrolyte
- Available on a compact sized panel (280 x 180 mm)

Dissolved Oxygen 0-20 ppm Saturation 0-200%

#### **AMI Oxytrace QED**

Measurement of trace dissolved oxygen including integrated autoverification

- Faraday electrode setup for automatic or manual verification by electrochemically generated oxygen concentration in the ppb range
- Monitoring of electrolyte and membrane integrity through faraday verification
- Easy to handle membrane and electrolyte exchange, sensor cap for up to 24 months of operation
- Available on a compact sized panel (400 x 420 mm)

Dissolved Oxygen 0-20 ppm Saturation 0-200%

#### **AMI Hydrazine**

Membrane-free, amperometric three electrode system for determination of hydrazine or carbohydrazide

- Low maintenance device without need for membrane or electrolyte exchange
- Highly reliable measurement with stable zero-point, sample conditioning without measurement interference
- Long-life sensor due to automatic sensor cleaning and continuous monitoring of cleaning efficiency

Hydrazine 0-600 ppb Carbohydrazide 0-600 ppb

Dissolved Hydrogen (H<sub>2</sub>) 0-800 ppb Saturation 0-50%

# Organics (UV<sub>254</sub>)

#### AMI SAC254

Measurement of UV absorption at 254 nm (SAC254) for organic carbon trending

- Insensitive to fouling of the optical components due to dynamic measurement at multiple path lengths
- Integrated grab sample function
- Correlation to DOC, TOC and other paramaters via calibration or manual configuration of the correlation parameters
- Integrated turbidity correction at 550 nm per DIN 38404-3

#### pH/Redox Potential

### **AMI pH-Redox QV-Flow**

Potentiometric determination of pH value or redox potential for low conductivity samples

- pH or redox electrode with liquid electrolyte reference sensors, and Pt1000 temperature probe
- Automatic temperature compensations models for pH measurement, for high purity water
- Straightforward calibration procedure without sensor disassembling
- Economical operation of the instrument due to refillable liquid electrolyte

# AMI pH-Redox M-Flow

Potentiometric measurement of pH value or redox potential for surface water, cooling water and effluents

- pH or redox combined electrode with gel electrolyte, with a Pt1000 temperature probe
- Automatic temperature compensation for pH measurement according to Nernst
- Easy calibration without sensor disassembling
- Minimized maintenance with optional spray nozzle for sensor cleaning

UV Absorption UVA 0-300 m<sup>-1</sup> UV Transmission 0-100% DOC, TOC Concentration ppm pH Range pH 1-12 Redox Potential (ORP) -500 to +1500 mV pH Range pH 1-13 Redox Potential (ORP) -400 to +1200 mV

#### **Silica**

#### **AMI Silica**

Colorimetric measurement of reactive silica in the water steam cycle and demineralized water production

- Detection limit of 1 ppb
- Automatic zero prior to each measurement
- Selectable measurement interval for low reagent consumption
- Easy to use, integrated grab sample capability
- Optional 2nd sample channel, or automatic sample sequencer up to 6 sample streams

#### **AMI Silitrace**

Determination of trace concentrations of silica

- Detection limit of 0.5 ppb
- Automatic sample heating and regulated reaction time features for highest precision
- Automatic zero verification (daily)
- Programmable, automatic calibration
- Easy to use, integrated grab sample capability
- Optional 2nd sample channel, or automatic sample sequencer up to 6 sample streams

Silica 0-1000 ppb

#### **Sodium**

#### **AMI Sodium P**

Dissolved sodium for samples with pH≥7

- Detection limit of 0.1 ppb
- Reliable alkalization reagent addition system for diisopropylamine or ammonia, with continuous pH-monitoring and alarm
- Automatic temperature compensation and simple two-point calibration
- Easy to use, integrated grab sample function
- Optional 2nd sample channel, automatic sample sequencer up to 6 sample streams, and automatic regeneration of sodium electrode
- Available on a compact sized panel (375 x 700 mm)

Sodium 0-10000 ppb

Silica 0-5000 ppb

# **Total Organic Carbon**

#### **AMI Sodium A**

Dissolved sodium measurement for samples with pH≥2 and pH<8

- Detection limit of 0.1 ppb
- pH controlled alkalization reagent addition for diisopropylamine with maintenance-free air pump
- Optional 2nd sample channel, or automatic sample sequencer up to 6 sample streams

#### **AMI Soditrace**

Measurement of trace sodium concentration in high purity water

- Lowest available detection limit for sodium ion concentrations of 0.001 ppb
- pH controlled alkalization reagent addition for diisopropylamine to a pH 12, via maintenance-free air pump
- Programmable automatic threepoint known addition calibration in ppb-range (detection limit for sodium remains: 0.001 ppb)
- Programmable automatic regeneration of sodium electrode

#### **AMI-II LineTOC**

Online monitoring for Total Organic Carbon (TOC) in high purity water

- Reagent-free monitoring system using conductivity differential prior to and after UV-oxidation
- Reaction time below 2 minutes, for fast trend identification without costly lab analysis
- Easy to use, integrated grab sample function
- Available on a compact sized panel (700 x 450 mm)

Sodium 0-10000 ppb Sodium 0-10000 ppb Total Organic Carbon (TOC) 0-1000 ppb

#### **Turbidity**

Contact-free measurement of turbidity in raw water, water treatment plant, cooling water and effluents

AMI Turbiwell 7027/W/LED

- AMI Turbiwell W/LED as per US EPA 180.1
- AMI Turbiwell 7027 as per ISO 7027 (infrared red LED)
- Heated optics prevent measurement errors and condensation
- Integrated constant head for continuous sample flow into the measuring chamber
- Fast and easy verification with primary and secondary standard
- No consumables, no wearing parts, no maintenance costs
- Optional deltaT flow meter, and sample degasser to avoid the formation of interfering bubbles in the sample

Turbidity (ISO) 0-200 FNU/NTU Turbidity (EPA) 0-100 FNU/NTU

#### **Portable Instruments**

#### **AMI Turbiwell Power**

Contact-free turbidity measurement for corrosion product trend monitoring

- LED light source for long life and stable measurement, heated optics to prevent condensation effects
- Automatic or manual draining of the measuring chamber for cleaning
- Non-contact design avoids fouling of optical surfaces and analyzer drifting: calibration-free

# **AMI Inspector**

Portable quality assurance (verification) of existing online measurements. Available for conductivity, hydrogen, oxygen and pH measurements

- USB data logger interface for lifelong data storage at a selectable interval
- Rechargeable battery for more than 24 hours of stand-alone operation
- Recertification by Swan possible

Conductivity
0.055-1000 µS/cm
Hydrogen
0-800 ppb
0-50% Saturation
Dissolved Oxygen
0-20 ppm
0-200% Saturation
pH Range
pH 1-12

Turbidity 0-200 FNU/NTU

### **Options**

# **AMI Sample Sequencer**

Complete system for the automatic, continuous multiplexing of up to six sample streams to one process analyzer

- Complete system including control unit, back pressure regulator and needle-valve for each stream, and flow measurement
- Signal outputs for indication of active sample stream and flow alarm
- Optional module to use conjointly with these monitoring systems:
  - AMI Sodium P
  - AMI Sodium A
  - AMI Silica
  - AMI Silitrace
  - AMI Phosphate HL

### **Cleaning Module**

Reliable accurate measurements ensured by counteracting biogrowth inside the flow cell and photometer

- Automatic cleaning with addition of one or two cleaning solutions (e.g. 2.5% hypochlorite solution and/or diluted sulfuric acid 2.5%)
- Individual programmable cleaning interval
- Automatic reagent level monitoring
- Optional module to use conjointly with these monitoring systems:
  - AMI Codes-II
  - AMI Codes-II CC
  - AMI Codes-II TC
  - AMI Phosphate-II
  - AMI Phosphate HL
  - AMI SAC254

# **Swan AMI Monitor Concept**

Swan instruments are delivered as fully functional, ready-to-use instruments. This ensures easy system integration as well as user-friendly operation and maintainability.

Highest standards in development and production assure the instrument quality expected by our customers.

#### **Full System Integration**

- Complete panel-mounted systems with fluidics connections preconfigured for quick start up
- Various communication possibilities with Profibus, Modbus, HART-Protocol, USB-interface and analog output
- Simple process engineering with regulation functions (P, PI, PID or PD), relay or analog output

#### **Easy Maintenance**

- Uniform menu navigation for easy operation and maintenance – one platform for all instruments
- Clearly arranged setup of instruments, good accessibility of all components for efficient operation and maintenance
- Self-explanatory maintenance procedures can be easily performed by the operating company

### **Highest Quality Assurance**

- Every analyzer is wet bench tested and factory calibrated prior to delivery
- Automatic instrument alarms and self-diagnostic such as reagent level and sensor functions for validated results
- Integrated sample flow control for measurement check available for all analyzers

#### **Swan Customers Service and Maintenance**

# Expert Training and Maintenance

- Flexible on-demand or scheduled maintenance services
- Expert re-calibration and re-certification options
- Comprehensive product trainings to boost your team's expertise

# **After-Sales Support**

- Skilled engineers ready to assist with any technical request
- Scheduled maintenance visits to prevent downtime
- Fast, reliable service on-site or remote

# **Genuine Parts** and Repairs

- On-demand service including delivery of spare parts and consumables
- Authentic Swan sensors, reagents, and components
- Convenient send-in repairs at regional Swan workshops
